PATENT Elastic Fire and Water Proof CEMENT ROOFING.

THE undersigned is prepared to introduce into use in Tennessee W. E. CHILLIS & CO'S PATENT ELASTIC FIRE AND WATER-PROOF CEMENT ROOF. ING, and asks the attention of Architects, Builders Railroad Companies, and the public, to examine its superiority over other Roofing.

Architects and Builders chould not fail to examine this Roofing, as it is better and cheaper than any thing in use. The material forms a hard and smooth surface that will resist th action of the atmosphere in every climate. It is impervious to water, existic, and flexible. It contracts id expands with the changes of the atmosphere, and

will neither evaporate, crack nor rot; and, as to its urability, there is no question.
It is practically imperishable, and will perfectly re ist any ordinary external expensive to bre, as is fully nd abundancy proven, and we will warrant it water proof. We will engage to put our Rooting on over or-dinary good shoatling, old shingles, tar and gravel, tin, zac, copper, or iron roots—it making no difference how steep or that they may be-for seven dollars per one hundred square feet; it being for cheaper than any roof of the old style, and we are sure it will give bet or satisfaction.

It will also be found to be the best thing ever inrented to cover or mend old leaky tin, tar and gravel ools, or around chimneys, scattles, dormer windows and gutters, where the ton is rusted through. This Coment can be put on to last as long as stone, and form a perfect ashesion to any object to which it is applied. The Roots can be comented over (and war-ranted not to leak) at two dollars and fifty cents per best thing for covering large Roots where they are ex-posed to hie-such as cleam Mills, Saw Mills, Factories, Railrono Cars, Bridges, Lepots, Station Houses etcumbent Lecks, and in fact every kind of Roof where there is an external exposure from fire. As the Roof r fice to communicate, and any fight substance wil burn out without guiting.

West's Patent Galvanic Cement. FOR ROOFING. THE subscriber is now prepared to cover roofs of buildings, with a new and better article than ever before known. The public are aware that our Government has had scientific men experimenting, and that it has been the study of the Architects and Builders, for years, to discover an article for roofing purposes, that would stand the sudden changes of the weather, and be impervious to fire and water, and remain a perma-nent fixture. As yet, nothing has been attained without costing more than the people wish. The contracon, expansion and rusting of metal roofs, are so great n changeable climates, that they become useless, unless being repaired at great expense yearly. Shingles are not fire proof, and can not be used on flat roofs, and the various Compositions and Coments that have been brought into use for roofing, do not stand the action of the weather, but they run when it is warm, and crack when fresty, and after one or two years become umbly and worthless: whereas, the inventor of the ranic Cement, has labored twenty years to combine cles to obviate those difficulties, and can testify from | monof this Cement is such that it is calculated for entire without removing them; liming cave-troughs, scanning around buttlements, chimneys and sky lights. Coverfrom rusting and unsoldering, and resists the extremes of heat and cold better than anything ever invented, for entire roofs or for covering metal and the out-side of wood buildings, making them fire-proof. Its ap-

carance is like state; beautiful for the rich palace or The undersigned having secured the right to the State l'ennessee, will sell rights of Territory, by Countles Towns, on reasonable terms; The subscriber is also prepared to cover roofs of unichings, in any part of the State, at short notice: This Roof is now being pet on in this city, for the enclit of all concerned, and warranted to excel all ther modes of Roofing. The subscriber has had his year and a half in the city of Memphis, which has roved satisfactory, to which a number of the most ominent citizens can testify. W. S. BENNETT, Proprietor. Attached is a note from Joun L. Mongan, Esq., Arch itect, by which may be seen the opinion of Mr. camuel Slean, the celebrated Architect, and writer upon Architecture, whose experience with this mode of rooting, without a doubt, is satisfactory to all.

Minurus, March 12, 1857. Mr. W. S. BENNETT. -When in Philadelphia, Pa., a few days ago, I called upon Mr. Samuel Sloan, the celebrat ed Architect, and author of the Sloan Work on Archi tecture. Tasked his opinion as to the durability, &c., of West's Patent Roof, such as you are using in the city of M mphis, and he told me that he had no hesitation in saying to me that it is a good and durable roof, and

is all that its advocates claim it to be; farther saying that he is using it on a fine building for himself.

Respectfully, JOHN 1. MoltGAN, Architect. OFFICE OF MISS. CENTRAL & TENN. R. R. Co. ) BOLIVAR, TENN., Oct. 1, 1867. ]
This will certify that the M. C. & T. R. R. Co. have surchased of Mr. W. S. Bennett, the right to use on neir Cars, Bridges, Buildings, &c., &c., West's Galvanic Cement. Having seen it used and tested, I have no esstation in recommending it to be the best and cheapest covering now in use.

To WHOM IT MAY CONCERN:-This is to certify that the Memphis and Charleston Radroad Company have pur-chased of W. S. Bennett, the right to prepare and use upon their Depots, Buildings, Cars, &c., &c., West s Galvanic patent are and water proof Booting, and that we believe it to be an economical and durable cover ing, having already had it in use for eight months. SAM. TATE, President. F. C. ARMS, Gen'l Supt.

W. S. BENNETT, Esq.—Dear Sir.—The facts within our knowledge of the durability, &c., of West's Galvanic

Cement; are these; The building you covered for us last Spring, I am happy to state, has answered our expectations. We can, therefore, recommend it to the public for all roofing purposes; as a light, cheap, fire and water proof roof. It does not get soft and run from the effects of the heat of the sun; nor does it harden and crack from the effects of the cold. Any persons wishing to know more of this article, can call at our manufactory.

To mor Public —W S. Bennett mails application to slast Summer to cover our buildings with West's Galvanic Coment: it being a new thing, we thought we would try it; had a applied to our Blacksmith Shop and Engine House, attached to the Foundry. They have proved all requirest of a water proof root, having with stood some of the greatest storms, and are giving good satisfaction. We can only add, try it and you will be satisfied. CURTS & KNAPP, from Founders.

Mr. Bennett has done some small amount of roofing for me in his peculiar way, with Cotton stuff, coated with a preparation the base of which appears to be a Coal Tar. It is a very effectual and light roof, and appears to promise considerable durability, from the preservative qualities of the composition, which penetrates the cloth and protects it from the influence of the air and water. The Composition does not liquidy and run from the effects of the beat of the sun in summer; nor does it harden and crack from the influence in the cold of Winter.

AYER'S CHERRY PECTORAL FOR THE RAPID CURE OF Coughs, Colds, Hoarseness, Influenza,

Bronchitis, Whooping-Cough,

Croup, Asthma, Incipient Consumption, And for the relief of Consumptive pa-tients in advance stages of the disease. We need not speak to the public of its virtues. Throughout every town, and simost every hamlet of the American States, its wonderful cures of pul-monary complaints have made it already known. Nay, few are the fam-ilies in any civilized country on this continent without some personal exp rience of its effects; and fewer yet the communities any where which have not among them some living trophy of its victory over the subtle and danger-ous diseases of the throat and lungs. While it is the most powerful antidate yet known to man for the formidable and dangerous diseases of the pulmo-nary organs, it is also the pleasantest

nary organs, it is also the pleasantest and safest remedy that can be employed for infants and young persons. Parents should have it in store against the insidious enemy that steals upon them unprepared. We have abundant grounds to believe the Chemy Phymans says many lives have been them impresared. We have abundant grounds to be-heve the Cherry Preparation and the properties by the con-sumptions it prevents than those it cares. Keep it by you, and core your colds while they are carable, nor neglect them until no human skill can master the inex-orable canker that, fastened on the vitals, eats your life away. All know the dreadful fatality of lung dis-orders, and as they know too the virtues of this remedy, we need not do more than to assure them it is till made the best it can be. We spare no cost, no care, no toil to produce the most perfect possible

and thus afford those who rely on it the best agent which our skill can furnish for their cure. AVER'S CATHARTIC PILLS. THE sciences of Chemistry and Medicine have been taxed their utmost to produce this best, most per-fect purgative which is known to man. innumerable proofs are shown that pass in excellence the ordinary med-icines, and that they win unprece-dentedly upon the esteem of all men. They are safe and pleasant to take, but powerful to cure. Their pen-

ctrating properties stimulate the vital activities of the body, remove the obstructions of its organs, purify the blood, and expel the disease. They purge out the foul humors which breed and grow distemper, stimulate sluggish or disordered organs into their natural action, and impart healthy tone to the whole system. Not only do they cure the every-day complaints of every body, but also formidable and dangerous dis-eases that has baffled the best human skill. While they produce powerful effects, they are at the same time, in diminished doses, the safest and best physic that can be employed for children. Being sugar-coated, they are pleasant to tike; and being purely vegetable, are free from any risk of harm. Cures have been made which surpass belief were they not substantiated by men of such exalted position and character as to forbid the suspicion of untruth. Many eminent clergymen and physicians have lent their names to certify to the public the reliability of my remedies, while others have sent me the assurance of their conviction that my Preparations contribute immensely to the relief of my afflicted, suffering fellow his long experience, and numerous testimentals from reliable persons, who have had his combination applied to their buildings, that his Coment is the cheapest and best article ever before known.
